

Laser Treatment for Fungal Nail Infection

- You will need up to three treatments.
It costs €50 per session.
- We will treat your nails every one to two weeks.
You may feel some heat or discomfort with this treatment.
- We will take nail clippings to detect infections before first treatment.
- It will take six to twelve months after completing treatment for nails to grow out clear.
- International studies show a success rate of approximately 75%.
- If the nails are very badly infected you may need to take anti-fungal tablets for up to three months.
- Please remove nail polish before laser treatment
