## **RETINOL RESURFACING SERUM 0.25**

*A microencapsulated 0.25% retinol treatment that improves skin tone and texture and corrects the signs of aging. Recommended for all skin types.*

Retinol Resurfacing Serum 0.25 is a pure microencapsulated retinol serum that helps you achieve a more radiant and even complexion. It reduces the appearance of fine lines and wrinkles and improves texture and tone by stimulating collagen production and speeding cell turnover. This formula also targets acne-prone skin, minimizes pore size appearance and helps clear uneven pigmentation like PIH and melasma. Unlike many other retinols, our retinol is high strength and microencapsulated using cutting-edge technology to allow for a gradual timed release into the skin overnight. By encapsulating the retinol and adding soothing and hydrating ingredients like niacinamide (vitamin B3), tea extracts, honey and sodium hyaluronate, maximal results can be achieved with minimal irritation. CONT.....

• DIRECTIONS

- Apply 1-2 pumps to face and neck after nightly cleansing. Follow with your favorite AlumierMD moisturizer. If you are not currently using a retinol product, begin using once or twice a week and gradually increase frequency to nightly as your skin adjusts.
- Caution: Do not use if you are pregnant, lactating or planning to become pregnant. Mild redness, peeling and irritation are expected when using this product. Use AlumierMD sunscreen during the day and limit sun exposure while using the product and for a week following discontinuation. For external use only. Avoid contact with eyes, eyelids and mucous membranes. Keep out of reach of children.

Start with the Retinol Resurfacing Serum 0.25% strength. After 3 months increase to the Retinol Resurfacing Serum 0.5% strength and later to the Retinol Resurfacing Serum 1% if you can tolerate the lower strengths. It takes at least 12 months to see a substantial improvement.
